ASDS RESIDENT Cosmetic and Surgical Derm ESSENTIALS

This exclusive educational offering provides a longitudinal core curriculum based on the ABD Certification Pathway Core Exam Study Guide for Surgical Dermatology. The program content incorporates all oncologic and cosmetic procedures.

The series will consist of 30 lectures, with 10 lectures being released each educational year. Lectures will be hosted live via Zoom and are free to attend. Each lecture will feature a topic expert, offer a live Q&A and be recorded for on-demand viewing following the live event.

"Through this program, we will ensure all residents in all programs are receiving standardized education that prepares them to be the experts in dermatologic surgery."
– ASDS/A President Vince Bertucci, MD, FRCPC

"This structured, comprehensive lecture series will cover core topics over the course of the dermatology residency, as well as more advanced concepts and hands-on training."
– Naomi Lawrence, MD, Chair of the Surgical Directors Forum
